

第24期-集成UI界面与权限管理

2020年9月2日 16:20

安装模块包

```
abp add-package Volo.Abp.AspNetCore.Mvc.UI.Theme.Basic  
Install-Package Volo.Abp.AspNetCore.Mvc.UI.Theme.Basic
```

```
DependsOn(typeof(AbpAspNetCoreMvcUiBasicThemeModule))]
```

引用前端包

package.json 前端包引用

```
{  
  "version": "1.0.0",  
  "name": "my-app",  
  "private": true,  
  "dependencies": {  
    "@abp/aspnetcore.mvc.ui.theme.basic": "~3.0.5"  
  }  
}
```

gulpfile.js 前端构建工具

```
"use strict";  
  
var gulp = require("gulp"),  
    path = require('path'),  
    copyResources = require('./node_modules/@abp/aspnetcore.mvc.ui/gulp/copy-resources.js');  
  
exports.default = function() {  
    return copyResources(path.resolve('./'));  
};
```

将CSS和JS嵌入到资源

```
<EmbeddedResource Include="Pages\**\*.js" />  
<EmbeddedResource Include="Pages\**\*.css" />
```
